Design-Build Surgical Center Program Management

Chris Carson, PSP Alpha Corporation Norfolk, Virginia

Mission

Provide Construction Managers and Owner Stakeholders with Real Time Information Relating

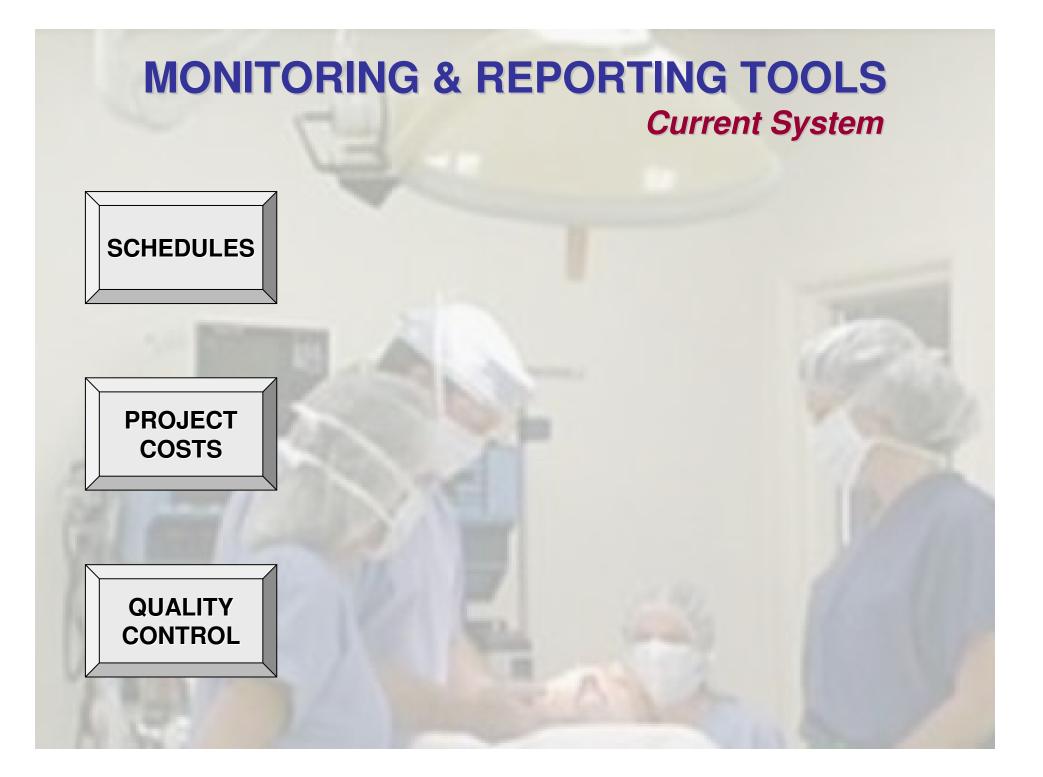

to Project:

- Schedules
- Costs
- Quality Control
 - Design
 - Construction
 - Post-Construction
- Multiple Stakeholders no experience in DB
 - * Medical staff, interior designers, administrators

Complications

Design Build Construction of Surgical Centers has a number of complications:

- Multiple Owner/Stakeholders
 - Surgeons, medical specialists
 - Medical System Administrators
- Owner Contractually Hands Off Design
 - Performance based requirements
 - Owner stakeholders lose daily control
- Risk in Communications
 - Partnering makes most sense
 - Requires innovative communications

MONITORING & REPORTING TOOLS Current System

- Preconstruction Milestone Schedule
- Contractor Baseline & Monthly Updates
- Overview Reporting

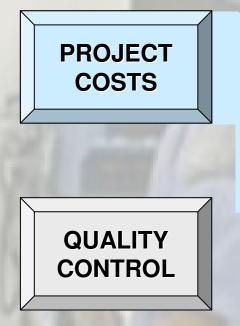

SCHEDULE

- Specifications Requiring Cost & Resource Loading
- Dashboard Engineering, Construction, Maintenance

MONITORING & REPORTING TOOLS Current System

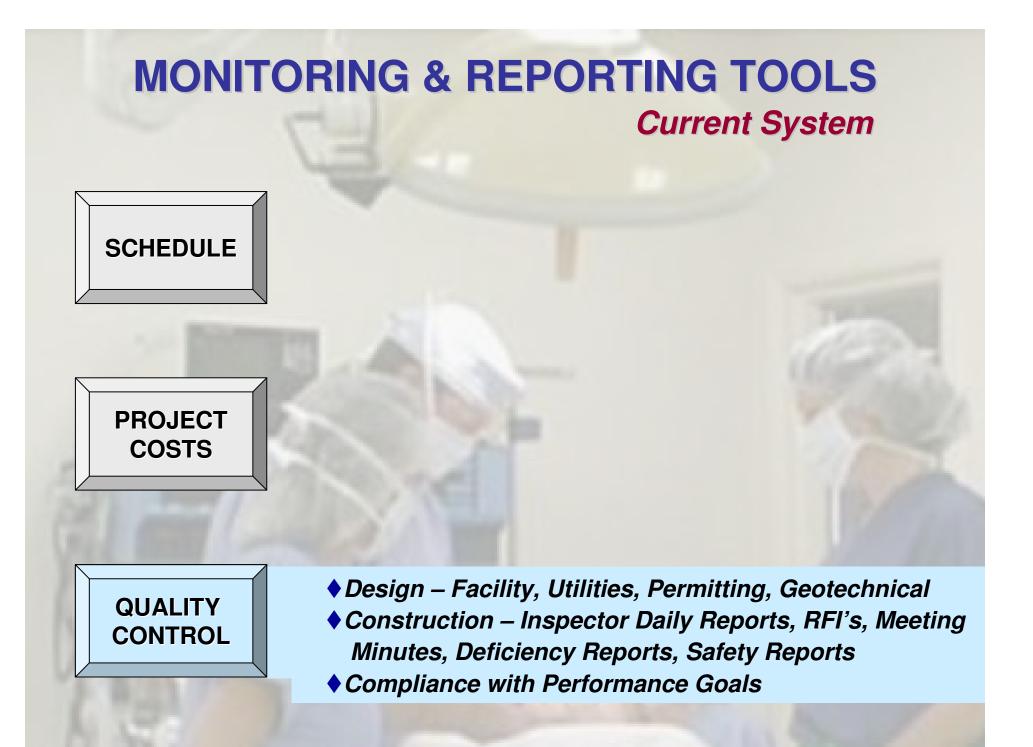

Preconstruction Estimate/Budget
 Contractor Budget at Design Stages
 Monthly Estimates & Cost Reports
 Variance Reports (Over-run and Under-run)

Work Orders, Change Orders, Directives

Dashboard - Engineering, Construction, Maintenance

IMPROVING THE CURRENT PROCESS

- Provide an integrated enterprise system
 - Summary management at program level
 - Collate existing information
 - Provide new communication and analysis tools – allow all team members access
 Eliminate repetitive data entry

Primavera Enterprise Provides the Tools For Effective Program Management

PROGRAM MANAGMENT

What is Program Management?

Monitoring of Schedule, Budget, Quality and Staff Resources to help make good business decisions in a DB construction program with multiple projects

Who can benefit from Program Management?

Any Medical Group implementing a Program for Construction of Surgical Facilities, especially Design-Build where the Contractor is the Designer

What are the Primavera Enterprise Tools?

Project Management, Methodology Manager, MyPrimavera, Portfolio Analyst, Timesheets

PRIMAVERA TOOLS OVERVIEW

- Project Management Module
 - Allows program view of multiple projects
 - Owner needs monitoring ability for design performance portion of Contractor Design-Build
 - Owner needs visibility throughout process
 - Use for planning, tracking, and controlling projects.
 - Store and manage all projects in a central location.
 - Provides consolidated summary information
 - Provides in-depth analysis tools for schedulers
 Partnering with DB Contractor requires a system

PRIMAVERA TOOLS OVERVIEW

- MyPrimavera Module
 - Combines any number of projects for a program view
 - Provides an interface for project managers who require Web-enabled project management functionality.
 - Users can create, manage, status, and schedule projects using their Web browsers.
 - Provides different views based on specific functionality and data access for the different roles that exist on a project team.

Success in Program Management Services Requires Performance that is

Thorough • Proactive • Responsive • Communicative

PROGRAM MANAGEMENT SERVICES

Design Goal Management
Coordination of Designers & Consultants
Pre-bid Schedule Development
Constructability Review
Cost Management
Value Engineering
Analysis of What-if Scenarios
for Construction Alternates
Monitor Achievement of Performance Goals at early
stages

PLANNING AND DESIGN

Owner Objectives

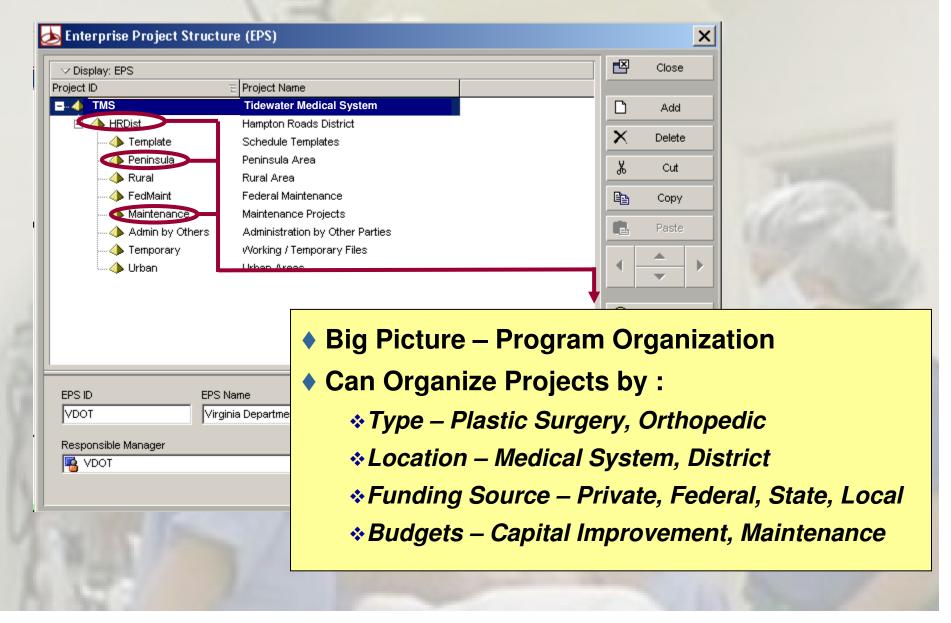

- Provide a Program for Multiple Project CM Packages
- Allow Program-Wide Decisions
- Improve Planning for Upcoming Projects
 - Resource & Manpower Planning
 - Ability to Examine Different Methods of Construction
 - Examination of Project Duration
- Flexibility in Creating Financial Models
- Good Communication Among Full Team
- Provides Program Uniformity in Peer Review & Certification of Surgical Facilities

PLANNING AND DESIGN

Construction Management Solutions

- Projects are easily coordinated and managed through the system organization.
 - Enterprise Project Structure
 - Organizational Breakdown Structure
 - Work Breakdown Structure

Enterprise Project Structure (EPS)

Enterprise Project Structure (EPS)

Projects are Organized by Areas within the Standard EPS

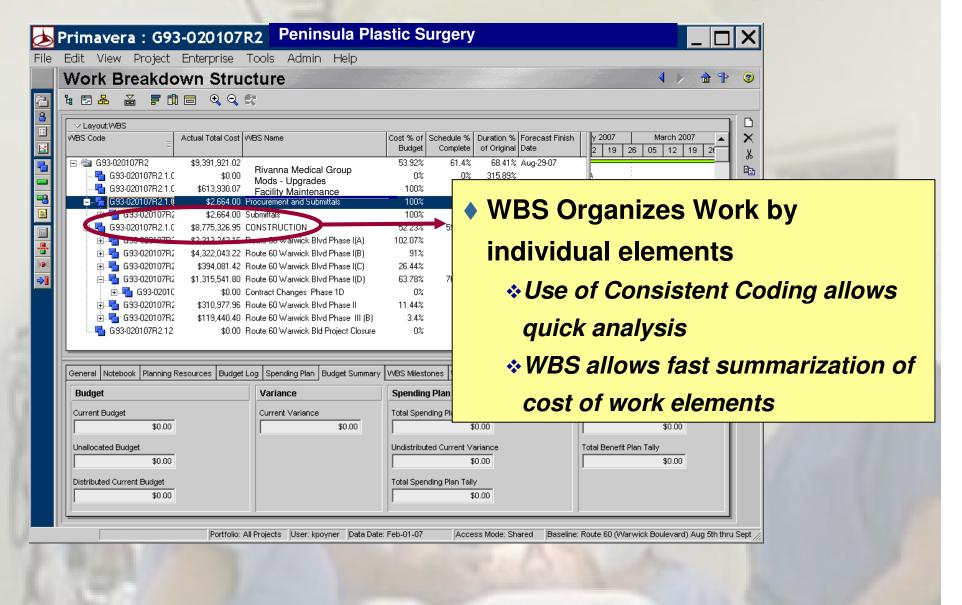

Expand each Area EPS to View Status

of Current Area Projects

Organizational Breakdown Structure (OBS)

Work Breakdown Structure (WBS)

PLANNING AND DESIGN

Planning for Upcoming Projects

- In-house Pre-Bid Schedules provide longterm planning opportunities
 - Cost loading with predicted costs shows future funding needs
 - Cash Flow predictions can be made
 - Resource loading with estimated numbers of Designers, Construction Managers, Project Managers, or Inspectors shows future manpower needs

PLANNING AND DESIGN

Planning for Upcoming Projects

- Alteration of variables allows for analyzing different construction methods:
 - Resource Availability
 - Costs for alternates
 - Production Rates (due to funding constraints, permitting issues, labor availability, etc.)
- Project durations are calculated from variables, finding the "best fit" duration for time and cost

PROGRAM MANAGEMENT SERVICES

- Full Program Design & Maintenance
- Construction Management
- Schedule Analysis
- Time Impact Analysis/What-if Scenarios
- ♦RFI & RFP tracking
- Documentation
- Quality Control Management
- Coordination / Communications
- Risk Analysis

Owner Objectives

- Implement Project Controls for Construction Projects
 - Analyze and Maintain CPM Schedules
 - Document Physical Percent Complete and Estimates to Complete
 - Provide Tools for Time Impact Analysis
- Provide a Program Containing CM Packages
 - Document Control & Communication
 - Issue/Risk Identification
- Prepare and Coordinate Cost Performance Reports

- Primavera provides one tool for analysis, complete with layouts and filters that enable quick, efficient analysis in support of organizational goals
 - Project Management Module for in-depth access to analysis tools
 - MyPrimavera Module for program-wide project views and communication

Project Controls

- CPM Schedules required by:
 - Project Specifications
 - Cost Loading requirements
- CPM and TIA analysis ensures Owner participation in funding needs for changes
- All project documentation recorded electronically, linked to each issue, analysis, request for change, etc.

PROJECT CONTROLS

- Cash Flow Predictions

PROJECT CONTROLS

Over-allocated Resources

PROJECT CONTROLS

- Time Impact Analysis via CPM Scheduling
 - Provides the means to evaluate time/cost requests
 - Provides best way to maintain control of changed conditions and Owner change requests
 - Supports negotiation of time and cost
 - Fairly places calculated risk back on Contractor
 Supported by case law

Program Management

- Facilitates Owner & CM review of entire program
- Keeps all team members in knowledge loop
- Allows at-a-glance view of program
 - MyPrimavera dashboards
 - Real time data availability
- Issue and Risk Identification
- Allows program-wide budget and cash flow analysis
- Allows sharing across projects of critical Designer and CM resources

CONSTRUCTION

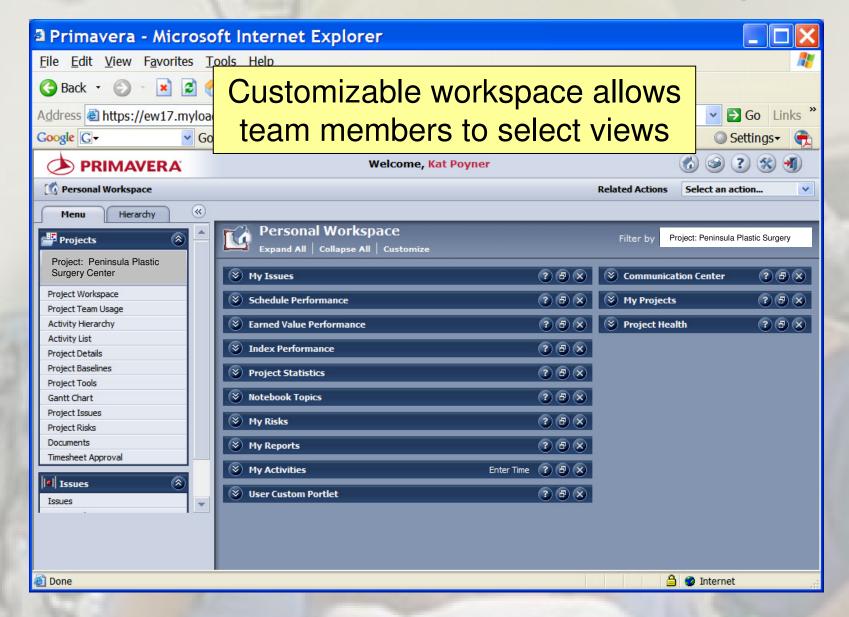

Construction Management

- Improve internal communication and understanding of projects at project level
- Document Control
 - Printed Reports
 - RFI, Submittal, Change Management Logs
 - Correspondence Logs
- Issue and Risk Identification
- MyPrimavera allows roll-up program-wide review

CONSTRUCTION MANAGEMENT MyPrimavera

- All data summarized to both Project and Program level information
- Access to real time information in Project
 Management Module
 - Dashboard Views
 - Simple Navigation
- Ability to communicate with project staff in a common workspace
- Owner Stakeholders can have custom workspaces to view as much detail as needed.

ads Budget Summary

REA & CLAIMS AVOIDANCE / RESOLUTION

- Program Management System promotes good documentation necessary for review/resolution of disputes
 - Schedules
 - Documents
 - Issues
 - Risks

REA & CLAIMS AVOIDANCE / RESOLUTION

- Integration of documentation into a centralized storehouse
 - Issues/Risks/Documents correlated to specific construction activities
 - Documentation kept current in single place
 - Contemporaneous information
 - Searchable database

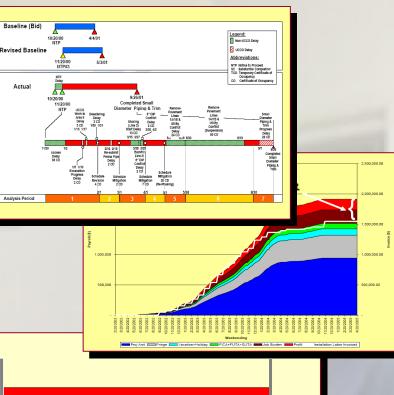

REA & CLAIMS AVOIDANCE / RESOLUTION

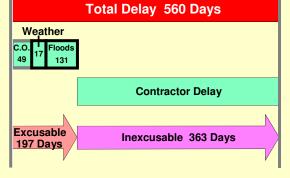

ISSUES HANDLED

- Differing Site Conditions
- Changed Conditions
- Change in SOW or Design Program
- Design Errors, Failure to Meet Specs
- Loss of Productivity
- Project Delays

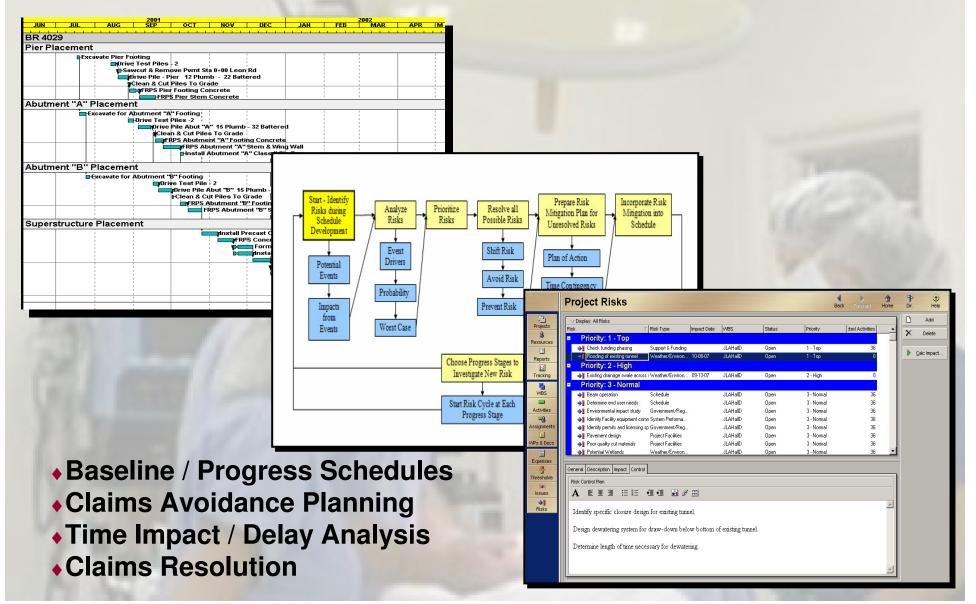

RESOLUTION METHODS

- Negotiation Strategy
- Construction Resequencing
- Design Alternatives
- Impact Analysis / Risk Assessment

Integrated Schedule / Risk Management Approach

Lessons Learned

Lessons Learned from Design Build Construction of Surgical Centers:

- Remember, Owners rarely understand DB
- Hold early Design Build training session
- Hold periodic meetings to reinforce DB
- Formal program development team
 - Medical administrator
 - Medical specialists Surgery & Anesthesia
 - Primary nurse staff
 - Interior designer (usually provided by MD)
 - Equipment supplier
 - Accreditation peer reviewer
- Design development feedback crucial

Lessons Learned

Lessons Learned from Design Build Construction of Surgical Centers:

- Get involved in accreditation standards early
- Include maintenance portion of accreditation
- Visit peer reviewer's surgical suite if possible
- Plan expansion for additional physicians
- Budgeting feedback more important than DBB
- Program should include serious discussion about all other potential services (hair transplants, skin care, non-surgical services)
- Weekly constructability reviews
- Program team approves plans only, no
 - submittal review (review only for compliance)

Lessons Learned

Lessons Learned from Design Build Construction of Surgical Centers:

- Projects are successful only if the competing goals of the Stakeholders are met
 - Surgeon Stakeholder Quality & Design
 - Medical Administrator Cost & Time
- Design Build requires timely communication
- Partnering is the most effective means
 - A Program provides the framework
 - Open & real time communications vital
- Enterprise Program Management provides a reliable way to learn from these lessons

Summary

Design Build Construction of Surgical Centers is best served by:

- Initiation of a Program approach
- Partnering throughout the construction
- A system that allows real-time resolution of all issues
- Enterprise Program Management is the best solution
- Primavera Enterprise system provides the right processes and tools for success
- Properly done, all goals can be met in every project

Design-Build Surgical Center Program Management
